

Yenka Engineering Knowledge Base

This folder contains internal backend architecture notes prepared for two audiences:

1. engineers onboarding into the codebase
2. YenkaAI ingestion and retrieval

Suggested ingestion order

1. [SYSTEM_OVERVIEW.md](/Users/kofibright/yenkaChat/yenka_knowledge/SYSTEM_OVERVIEW.md)
2. [CURRENT_ARCHITECTURE.md](/Users/kofibright/yenkaChat/yenka_knowledge/CURRENT_ARCHITECTURE.md)
3. [BACKEND_ARCHITECTURE.md](/Users/kofibright/yenkaChat/yenka_knowledge/BACKEND_ARCHITECTURE.md)
4. [API_STRUCTURE.md](/Users/kofibright/yenkaChat/yenka_knowledge/API_STRUCTURE.md)
5. [DATABASE_STRUCTURE.md](/Users/kofibright/yenkaChat/yenka_knowledge/DATABASE_STRUCTURE.md)
6. domain-specific docs such as livestream, feed, moderation, rewards, and notifications

Source of truth

These pages were derived from the current Node/Express backend under:

`yenkaChatBackend/RegLoginBackend`

They summarize actual route mounts, services, models, and socket events rather than idealized target architecture.

Export status

- Markdown: generated
- DOCX: not generated automatically in this pass
- PDF: not generated automatically in this pass

Reason: local Markdown-to-DOCX/PDF tooling is not set up in a way that preserves the wiki structure cleanly enough for internal docs. The Markdown files are the authoritative source for ingestion.
