Decision

The original app icon PNG supplied by the project owner is the required source for launcher and app-icon surfaces. The image must not be redrawn or visually edited; only resizing is allowed for Android density and web icon requirements.

The glow-backed logo remains useful for larger in-app/web logo display, while the rounded-square icon is used for app launcher, Play Store source art, browser app icon, and notification icon surfaces.

The exact original app icon source is preserved in the repo at `app/src/main/res/branding/yenkasa_app_icon_original.png`. Android launcher and web app-icon files were generated by resizing that PNG only.

Logo And Icon Locations Audited

Android launcher:

- `app/src/main/AndroidManifest.xml` uses `@mipmap/ic_launcher` and `@mipmap/ic_launcher_round`.
- Updated all launcher density assets:
 - `app/src/main/res/mipmap-mdpi/ic_launcher.png`
 - `app/src/main/res/mipmap-mdpi/ic_launcher_round.png`
 - `app/src/main/res/mipmap-hdpi/ic_launcher.png`
 - `app/src/main/res/mipmap-hdpi/ic_launcher_round.png`
 - `app/src/main/res/mipmap-xhdpi/ic_launcher.png`
 - `app/src/main/res/mipmap-xhdpi/ic_launcher_round.png`
 - `app/src/main/res/mipmap-xxhdpi/ic_launcher.png`
 - `app/src/main/res/mipmap-xxhdpi/ic_launcher_round.png`
 - `app/src/main/res/mipmap-xxxhdpi/ic_launcher.png`
 - `app/src/main/res/mipmap-xxxhdpi/ic_launcher_round.png`

Android in-app logos:

- `app/src/main/res/drawable/ic_yenkasa_foreground.png`
- `app/src/main/res/drawable/ic_yenkasa_logo.png`
- `app/src/main/res/drawable/ic_logo_emblem.png`
- `app/src/main/res/drawable/yenkasa_app_icon.png`

Android source and Play Store-ready artwork:

- `app/src/main/res/branding/yenkasa_logo_mark.svg`
- `app/src/main/res/branding/yenkasa_logo_glow.svg`
- `app/src/main/res/branding/yenkasa_app_icon_original.png`

- app/src/main/res/branding/yenkasa_play_store_icon.png

Web static logos:

Coin Logo Locations

Yenkasa coin/YKC artwork was corrected to use the original owner-supplied PNG. The image must not be redrawn or visually edited; only direct copy/resize is allowed.

- Original source preserved: app/src/main/res/branding/yenkasa_coin_logo_original.png
- app/src/main/res/branding/yenkasa_coin_logo.png
- app/src/main/res/drawable/ic_coin.png
- yenkasa-web/public/images/ykc.png
- yenkasaChatBackend/RegLoginBackend/public/images/ykc.png
- yenkasaChatBackend/RegLoginBackend/public/yenkasa_web/images/ykc.png
- yenkasa-web/src/config/cloudinaryStaticAssets.js
- yenkasaChatBackend/RegLoginBackend/public/images/cloudinary-static-assets.json

Splash And App Name Fix

The opening app name was changed from YenkasaChat to Yenkasa.

- app/src/main/res/values/strings.xml
- app/src/main/res/layout/activity_splash.xml
- app/src/main/res/values/styles.xml
- app/src/main/res/values-night/themes.xml
- app/src/main/AndroidManifest.xml

Splash background was set to black through a dedicated splash theme to avoid the white/black double-background effect during startup.

Badge Locations

Requested badge images were corrected to use the original owner-supplied PNG files from Desktop/YENKASA_Docs/yenkasaAppDocumentation/NewAssets/. The images must not be redrawn or visually edited; only direct copy/resize is allowed.

Original sources preserved:

Asset Fit

Play Store/app icon:

- Use app/src/main/res/branding/chenkasa_play_store_icon.png.
- Size: 1024 x 1024.
- Format: PNG.
- Background: dark rounded-square icon plate.
- Rationale: exact owner-supplied artwork, resized to required dimensions without visual redesign.

Web/app UI:

- Use logo.png for full-size mark display.
- Use app-icon.png for favicon/browser notification icon surfaces.
- Web source now points logo/app icon entries to local /web/images/... so the new assets are used instead of old Cloudinary URLs.

Store/landing:

- Use the glow-backed artwork for larger public store and landing logo surfaces.
- The legacy .jpeg file was converted back to real JPEG format after replacement.

Verification

Latest commands run:

- npm run build in yenkasa-web: passed.
- ./gradlew :app:installDebug: passed after replacing launcher, coin, and badge files from original PNGs.
- /Users/kofibright/Library/Android/sdk/build-tools/35.0.0/aapt dump badging app/build/outputs/apk/debug/app-debug.apk: passed metadata verification.
- adb devices -l: detected 146353755V007782, TECNO BG6m.
- Post-install ADB package metadata verification was intermittent after install, but Gradle reported Installed on 1 device and BUILD SUCCESSFUL.

APK metadata verified:

- versionCode=60
- versionName=5.3
- application-label='Yenkasa'
- launcher activity: xyz.yenkasa.app.ui.SplashActivity
- launcher activity label: Yenkasa
- APK path: app/build/outputs/apk/debug/app-debug.apk

Install note:

- Corrected APK installed successfully on TECNO BG6m - 14.
- The launcher icon files now come from app/src/main/res/branding/yenkasa_app_icon_original.png by resizing only.
- The coin and badge files now come from preserved original PNG sources by direct copy or resize only.

Remaining Manual Check

Open the launcher and visually confirm:

- Launcher icon matches the original supplied PNG.
- Splash opens on a black background.
- Opening app name is Yenkasa, not YenkasaChat.
- Verified and unverified badges render as image badges.
- Admin, senior developer, and junior developer badges render as the new badge images.
